Abstract (en)

[origin: EP0576798A1] On the twin-wire former of a papermachine, one endless wire (1) is brought together with the second wire (2) on an at least partially curved guide surface (4), which can be moved frictionally relative to the wires. This drainage region described is followed by a further guide surface (7) which, in advantageous embodiments, has the opposite direction of curvature and is spatially fixed. <IMAGE>
