Abstract (en)

[origin: EP0577017A1] An apparatus is specified for testing the dynamic behaviour, especially the aiming accuracy, of guns (tube weapons), which apparatus contains a video camera (10) and a video reproduction device (20), which is portable or can be inserted in a rack, for reproducing the image (video) supplied by the video camera. The video camera is mounted on or in the barrel (1) of a gun in such a manner that the optical axis (3) of the video camera corresponds very precisely with the bore axis (3) of the barrel (1). <IMAGE>
