Abstract (en)

[origin: WO9217375A1] The present invention relates to a packaging container consisting of two or more layers such as plastics or carton or only plastics. The packaging container is characterized in that the different layers are kept together substantially only through mechanical attachment to each other. The attachment includes that wartlike protrusions (4) have been made in the inner part (2) which cooperate with holes (3) in the outer part (1) and that overhangs (5) which form grooves (7) have been made in the inner part in which the outer part (1) fits.
