Abstract (en)

[origin: EP0578004A2] The invention relates to an espagnolette fastening having a slot/stud-controlled bolt (22), to which a press-back stop activated in the closing position is assigned, and proposes, for the purpose of achieving a simple design along with a high safety value, that the stud (20) slot-guided in the lock cover and lock bottom (10) pass through a control recess (24) of the bolt (22) and be taken up as a result of the positive engagement of an espagnolette recess (21). <IMAGE>
