Abstract (en)

The invention relates to a tablet dispenser, comprising a dispenser housing (10), a replaceable tablet package (11) to be accommodated in said housing, an adjustable periodicity indicator (18) and a single tablet dispensing aperture (19) in the dispenser cover (13). The tablet package comprises a cover (27), rotatably connected to the bottom portion (25) of the package and provided with an opening (28) which, upon use of the dispenser, is in alignment with the tablet dispensing aperture. The dispenser further comprises locking means to compel joint rotational movement of periodicity indicator and package bottom portion, and an operating member to effect stepwise rotation of said package bottom portion relative to said package cover. <IMAGE>
