Abstract (en)
A method of filling a container 6 with particulate material 8 and gas under pressure includes the steps of fluidising the particulate material contained in a vessel 3 and permitting its flow towards a filling valve 5; passing the gas from a cylinder 9 towards the filling valve 5 via line 14; and opening the filling valve 5 to permit the fluidised particulate material 8 and the gas to pass simultaneously therethrough to enter a container 6. <IMAGE>
