Abstract (en)

[origin: EP0578577A1] The invention relates to a novel hinge structure for a door of a box and a method of fitting this hinge. According to the invention, a first hinge element (46) of U-shaped cross-section and a rim of L-shaped cross-section possessing a folded-over part (45) are provided on the box, the hinge element being housed in this rim and having a U-shaped flange (53) set (crimped) into the folded-over part. Application especially to the design of letter boxes. <IMAGE>
