Abstract (en)

[origin: WO9218390A1] A tube capping assembly (12) includes a force transmitting member (38) that transmits axial and bending components of the body force of the capping assembly (12) to a tube (10). The force transmitting member (38) may be integral with the sleeve (24) of the capping assembly, or may be an annular washer-like member separate from the capping assembly. The separate member may be integrally formed or may be formed from conjoinable segments.
