Abstract (en)

[origin: EP0579068A1] A lampholder unit (1), in particular for a refrigerator or the like, comprises a pushbutton (21) arranged to cooperate with a usual door of said refrigerator, and a seat (4) for a usual lamp (8). The lamp seat (4) is provided in a one-piece body (2) comprising a further seat for a movable member (27) associated with the pushbutton (21) and carrying an element (47) arranged to cooperate with at least one connector (50) removably inserted into a respective housing (51) in said body and connected to a usual power line (57), said movable member (27) being opposed in its movement by an elastic element (32) arranged in the seat which houses said member, an insert (54) removably associated with said body and cooperating with the lamp (8) being able to be connected to said connector (50) via the element (47) carried by said movable member (27) so as to electrically power said lamp (8). <IMAGE>
