Abstract (en)

[origin: EP0579858A1] The invention relates to the packaging of stacked goods on a pallet by means of a foil cover (2) made of shrinkable plastic. A flow state between the goods stack and the foil cover is generated in that a blower takes effect on the opening side, and in that the foil cover possesses, furthermore, at least one ventilation orifice (9), so that the cover and goods stack remain movable relative to one another. <IMAGE>
