Abstract (en)
[origin: EP0580077A1] The invention relates to a table with a movable worktop (3) on a table frame (5) provided with legs and preferably made of solid wood. The worktop (3) can be simultaneously adjusted horizontally in a rectilinear longitudinal guide arrangement (31) and into an angled position relative to the horizontal about a pivot (17) in the front region of the longitudinal guide arrangement (31) via a generally wedge-shaped guide strip arrangement (13). This invention provides a table with a movable worktop (3) which can be handled in a simple and space-saving manner and can be adjusted to an ergonomically favourable position, simultaneously horizontally and vertically relative to the support plane on the table frame (5). <IMAGE>
