Abstract (en)
[origin: EP0580456A1] The invention relates to a scaffolding. This scaffolding consists of two single straight ladders (1) with rungs (9) mounted on their uprights (11), and of a platform (3) fixed on the ladders via its ends and via connection arms (7), characterised in that the platform (3) comprises at least two hooks (5) by means of which it can be fixed to the rungs (9) of the ladders which are positioned vertically, and at least one connection arm (7) which is fixed to the platform and to a ladder in a triangular configuration and is articulated laterally with respect to the actual platform, the axis of articulation (17) of the arm with respect to the platform being in the same plane as the axis of the rung (9) supporting the platform. <IMAGE>
