Abstract (en)  
[origin: US5490350A] PCT No. PCT/DE92/00319 Sec. 371 Date Feb. 10, 1994 Sec. 102(e) Date Feb. 10, 1994 PCT Filed Apr. 15, 1992 PCT Pub. No. WO92/18038 PCT Pub. Date Oct. 29, 1992. A Christmas-tree stand (2) essentially consists of a housing (6) in which two clamping bars (18, 20) are rotatably supported so as to allow a swivelling movement around two support pins (22, 24). The activation of the clamping straps (18, 20) takes place via a central clamping device which essentially consists of a threaded rod (26) with two inversely threaded sections (32, 34) constructed thereon. When rotating the threaded rod (26), the free ends of the clamping bars (18, 20) are moved along by the nuts (30, 30') running along with the threaded sections (32, 34), so that a Christmas-tree trunk can be fixed or fastened between the clamping bars (18, 20).

Abstract (fr)  
Un socle pour arbre de Noël (2) consiste essentiellement en un corps de support (6), dans lequel deux bras de serrage (18, 20) peuvent pivoter autour de deux axes (22, 24). L'entraînement des bras de serrage (18, 20) se fait au moyen d'un dispositif de serrage central, lequel est composé essentiellement d'une tige filetée (26) munie de deux sections filetées de sens opposés (32, 34). Lorsque la tige filetée (26) fait un tour, les extrémités libres des bras de serrage (18, 20) sont entraînées par des écrous (30, 30') tournant avec les sections filetées (32, 34), de manière que le tronc d'un arbre de Noël peut être fixé ou serré entre les bras de serrage (18, 20).
