Abstract (en)

[origin: WO9218020A1] A method for preparing a sheet material for the manufacture of smokable products such as cigars, cigarettes or the like, wherein flavouring substances or compositions are added to the pulp during material manufacture for release only when the smokable product is lit, said substances being incorporated by molecular encapsulation or complexing in cyclodextrins, and wherein steps are taken to ensure that all of said flavouring substances are incorporated in the cyclodextrins. A sheet material produced by the above mentioned method is also provided for wrapping a smokable product or for use as a leaf of reconstituted tobacco manufactured according to a known paper-making technique.
