Abstract (en)
[origin: EP0580957A1] The invention relates to an air filter for internal combustion engines with a filter housing, an air filter element arranged in the filter housing and a fixing element for fixing the air filter (12) on the internal combustion engine. A flexible connection is provided between the air filter and the intake duct of the internal combustion engine. The connecting element of this flexible connection comprises at least one oscillating metal element (18, 19) and a flexible intermediate pipe (25), the oscillating metal element and the flexible intermediate pipe forming a connection module between air filter and intake duct. <IMAGE>
