Abstract (en)
[origin: EP0580962A1] In a refrigerator door (10) with, arranged on its inside (12) between vertical uprights (15, 16, 17), tray-like shelf compartments (19) which serve to receive standard vessels which can be set down therein, such as bottles, parallelepipedal packets or the like, the stability of which in the shelf compartments (19) is supported, during opening of the refrigerator door (10), by a U-shaped holding bow (46, 68), the holding bow (46, 68) can be pivoted within predetermined catch positions (I, II), the catch positions being adapted to the dimensions of the standard vessels in such a manner that the holding bow (46, 68) is at least approximately tangent to the outer contour of the vessels. <IMAGE>
