Abstract (en)

[origin: EP0581271A1] A transporting container which takes ecological aspects into account and can be collapsed in the empty state, preferably in the format of a standard pallet, is designed to receive objects to be transported which are, in particular, self-supporting, and is composed of a bottom (34), a lid (33) and a foldable casing (36), the bottom and lid having grooves which act in a positive-locking manner and being connectable to the foldable casing (36) by clamping elements (43), in particular by flat clamping elements which are composed essentially of sheet-metal parts, but also by hooping elements to form a packaging unit. <IMAGE>
