Abstract (en)

[origin: EP0439748A2] A fixing device (5) for a drawer front (1), on which hooked holding parts (6) can be fixed which can be hooked into and braced with bearing parts (21), belonging to the drawer side walls (2), during assembly of the drawer front (1). Provided on each side of the drawer is a housing (5') which can be fixed by dowels (15) or the like to a side wall (2) of the drawer, preferably made of wooden material, for example a chipboard, and in which a bearing part (21) is mounted. Furthermore, there is provided a detachable holding device (50) for a pulling-out rail (14), fixed to the drawer, of a pulling-out guide set, the pulling-out rail (14) having at the rear a hook (40), with which it can be hooked into the drawer and, at the front, an open horizontal slot (11), into which a laterally projecting holding pin (13) of the holding device (50) protrudes. A retaining pin (9) which is displaceable perpendicular to the pulling-out rail (14) and is preferably subjected to the force of a compression spring (28), can be moved out of the pulling-out rail by means of a vertically movable unlocking rod (30).
