Abstract (en)
The tub comprises at least one arm (10) carrying, connected to the hydromassage system, one or more supplementary nozzles (11) for the pressurized water and possibly air jets; said arm (10) is secured to the container-tub (2) such that it can be moved between a rest position in which it lies to the side of the water mass and at least one further position in which said supplementary nozzles (11) lie in the upper region of the normal water mass; said nozzles (11) are orientated with a downwardly directed component. <IMAGE>
