Abstract (en)
[origin: EP0582408A2] An article carrier of the basket type, includes opposed side walls (23,49) opposed end walls (29,45: 31,47) a base (13, 13a), a medial partition structure (63,65,121,123) connecting together the opposed end walls and disposed substantially centrally of the carrier and a plurality of transverse partition panels (85,87: 101,103) connecting said medial partition structure with each of said side walls and thereby creating a number of article receiving cells within the carrier. An end wall (31,47) of the carrier is formed with a projection (P) to space the carrier from a like adjacent carrier disposed in an in-line relationship the projection being formed from integral portions (125,127) of the carrier blank taken from the end wall (31,47) of the carrier from which the projection extends.
