Abstract (en)

[origin: EP0582550A1] Described is a process for dyeing wool-containing fibrous materials with anionic dyes, characterised in that these materials are dyed in the presence of a wool preservative (protectant) containing at least one compound of the formula R-CH₂-CH(OH)-CH₂-Y (I> where the variables are each as defined in the claims. The process provides rub-fast level dyeings without loss of wool quality.
