Abstract (en)

[origin: EP0582784A1] The invention relates to supporting elements, in particular supporting elements (20, 40) which serve for supporting shelves (50) in the inner space of a piece of refrigerating furniture (10) and which are arranged in the rear region of the inner space and close to its opening and support the shelves (50) at their edges (52), the supporting elements (40) arranged close to the opening holding the shelves (50) positively in and counter to their direction of insertion into the inner space, while the supporting elements (20) arranged in the rear region are designed with a receiver (29) which is open in the direction of insertion and into which the shelf (50) projects with its edge sections (51, 52). Connected in front of the receiver (29) in the direction of insertion is a positioning aid (26) which guides the shelf (50) to the receiver (29). <IMAGE>
