Abstract (en)
[origin: EP0583557A1] The invention relates to a window glazing which comprises a double glazing with sealed-off interspace. Provided in the outer pane (2), instead of a known resistance layer, is an arrangement of parallel wires (3), by means of which the desired degree of reflection of this layer can be adapted, with a high degree of accuracy, to the requirements at the site of installation, and also the producibility is facilitated. <IMAGE>
