Abstract (en)

[origin: EP0583603A1] The invention relates to a thread guide bar 1 and a device for guiding a thread on a cross-wound bobbin on a textile machine 8. A multiplicity of winding points is attended by a thread guide bar which is made of carbon fibre-reinforced plastic and is movable back and forth. The thread guide bar 1 is provided with a covering 3. For heat compensation, the thread guide bar 1 has sections of highly heat-expandable material. <IMAGE>
