Abstract (en)
[origin: EP0583674A2] The present invention relates to a transport pallet having a lower base pallet (2) and an upper lid (4), it being possible for the base pallet (2) and the lid (4) with the product transported arranged between them to be braced against one another by means of at least one tensioning strap (10) having a tensioning element (8). In the braced state, the or each tensioning strap (10) rests at least in the approximately central region of the lid (4) against its underside facing the base pallet (2). <IMAGE>
