Abstract (en)

Described is a process for photochemical and thermal stabilisation of dyed and undyed polyester fibre materials. It is characterised in that the fibre material is treated with a compound of the formula <IMAGE> where R1 and R2 are independently of each other C1-C12alkyl. The process makes it possible to obtain highly lightfast and sublimation-resistant polyester and cellulose acetate dyeings and prints.

Abstract (de)

Beschrieben wird ein Verfahren zur photochemischen und thermischen Stabilisierung von ungefärbten und gefärbten Polyesterfasermaterialien, das dadurch gekennzeichnet ist, dass man das Fasermaterial mit einer Verbindung der Formel <IMAGE> behandelt, worin R1 und R2, unabhängig voneinander C1-C12Alkyl bedeuten. Mit dem vorliegenden Verfahren lassen sich hochlichtechte und sublimationsbeständige Polyester- und Celluloseacetat-Färbungen und -drucke erzielen.
