Abstract (en)
[origin: WO9221161A1] The invention concerns an antenna assembly which is intended particularly for use in conjunction with motor-vehicle components (21) and which has at least two antenna elements integrated in a component (21) made of an electrically non-conducting material. Manufacture of the assembly is particularly simple and operation particularly reliable by virtue of the fact that several individual antenna elements (1, 3, 7; 2, 4, 8) consist of a one-piece electrically conducting structure. This structure is preferably embedded in a plastic film.

Abstract (fr)
Un ensemble antenne, utile notamment avec des pièces d'automobiles (21), est composé de deux éléments d'antenne intégrés dans un composant (21) en un matériau non électroconducteur. Afin d'obtenir un ensemble particulièrement simple à fabriquer et ayant un fonctionnement fiable, plusieurs composants individuels (1, 3, 7; 2, 4, 8) sont constitués d'une seule structure électroconductrice. De préférence, cette structure est enrobée d'un film en matière plastique.
