Abstract (en)

[origin: WO9319233A1] At their free ends the yarns are straightened, clamped and welded with a film (8). Welding is performed with two welding bars (3, 4) to which is allocated a brush beam (5) to tension the yarns. The welding bars (3, 4) are borne and/or guided by a frame (2) to which the brush beam (5) is also secured. The frame (2) is fitted on a mobile chassis (1) which also has a holder to take a roll (7) of welding film (8). For use in weaving preparation works and in weaving works, especially in preparing the warp and in starting weaving.
