Abstract (en)
[origin: WO9318232A1] The proposal is for a set of paving stones for the production of circular and longitudinal layouts in paving in gardens and the like. In order to provide a plurality of patterns in straight and curved paving, paving stones with convex sides are used which are set out in a predetermined modular dimension. A flat finish in both laying and transport is provided by polygonal areas (17) on the side walls providing a flat surface when laid straight or curved.
