

Title (en)

Device for temporary feeding of evaporated fuel from the free space of a tank in the intake manifold of an internal combustion engine.

Title (de)

Vorrichtung zum vorübergehenden Einspeisen von im Freiraum einer Tankanlage befindlichen flüchtigen Kraftstoffbestandteilen in das Ansaugrohr einer Verbrennungskraftmaschine.

Title (fr)

Dispositif pour l'alimentation temporaire de carburant évaporé d'un espace libre d'un réservoir dans la tubulure d'admission d'un moteur à combustion interne.

Abstract (en)

[origin: JPH06159165A] PURPOSE: To provide an extremely simple structure so as to achieve technical and economical benefits in manufacturing and obtain precise and excellent service performances for a long period of service time. CONSTITUTION: A line can be sealed by an electromagnetically actuated valve 10. A valve seat 13 forms an axial restricting portion of a tubular nozzle 14. The nozzle has a first open cross section 15 in the area of the valve seat 13. The first open cross section tapers away from the valve seat 13 as considered in a flow direction to form a second open cross section 17. The second open cross section 17 conically widens in the area of the axial end of the nozzle 14 at the opposite side of the valve seat 13 to form a third open cross section 18. The third open cross section is larger than the first open cross section 15.
