Abstract (en)

[origin: EP0586291A1] The seat system comprises: - two grooved housings (7) which are integral with said base and extend approximately parallel to one another, - at least two feet (11) each comprising an elongate leg (15) which is terminated at its two ends by respective elbowed projections (16, 17), said projections (17) of the lower ends of the feet being introduced into the grooves of the respective housings (7) and being retained there in such a manner that the legs are erected while being inclined in relation to the vertical, - means for axial blocking of the feet in the respective housings, - a sitting surface (10) capable of resting on the elbowed projections of the upper ends of the legs (15), and - means of rapid connection of the sitting surface to the upper elbowed projections of said legs. <IMAGE>
