Abstract (en)

[origin: WO9222082A1] The invention relates to a solenoid switch for a starter of an internal combustion engine with a magnetic core allocated to a relay coil and an armature having a switching spindle which passes through an aperture in the magnetic core and on which is fitted a bush lying in a guide section of the aperture and bearing a contact bridge. It is distinguished in that a locking device (39) preventing rotation is arranged in the region between the magnetic core (6) and the bush (27).
