Abstract (en)
[origin: EP0586799A1] The invention relates to a device for fastening and connecting a multicore electrical cable to the motor of a pump, especially a submersible-motor pump having a tubular connecting housing, the connecting housing being fastened in an outwardly open opening in the motor housing and/or in the pump bearing support, especially being screwed in, and internally having a waterproof transverse wall which is arranged transversely with respect to the longitudinal axis of the connecting housing and in which conductive pins are integrally cast, which project parallel to the axis on both sides of the transverse wall and are plugged onto the sockets which are in each case on both sides and are connected to wires of the motor on the motor side and to wires of a connecting cable on the outside. <IMAGE>
