Abstract (en)

[origin: EP0586897A1] A method is proposed in which, for selecting traffic information, a directional fan (30, 31, 32, 33) is input by operating a key (15, 16, 17, 18) of a cruciform rocker switch (8) of a broadcast receiver, the position (34) of the broadcast receiver is determined by the computer (5) using program comparison and identification methods, and the traffic information relating to the selected directional fan (30, 31, 32, 33) is output via an output device (11), for example visually via a display or acoustically with the aid of a speech synthesiser (7) via loudspeakers (10). <IMAGE>
