Abstract (en)

[origin: EP0586957A2] The invention relates to a device for the dispensing of adhesive tape pieces from a reel of adhesive tape coated on one side and wound without release film. The device has a housing for receiving the reel and an opening in the case of the housing with guide parts for the adhesive tape. The guide parts (21, 22) facing away from the adhesive side of the tape (303) are designed with a tear-off edge part (23) and the guide parts facing the adhesive side (31) of the tape (303) are designed as two or three narrow webs (20) arranged adjacent to one another at a distance. Approximately diametrically opposite the opening (11) on the outside of the case of the housing (10), there is a loop (30) is attached externally for a belt for the operating person. A rewind lock or brake (40, 41) for the reel (50) is provided. <IMAGE>
