Abstract (en)

[origin: EP0586965A2] The present invention discloses an electrophotographic image-forming method comprising a charging step of charging an electrophotographic photosensitive member containing oxytitanium phthalocyanine in the photosensitive layer thereof by a direct charging method, an image-exposing step of exposing the photosensitive member having been charged to a light image to form an electrostatic latent image, and a developing step of developing the latent image formed on the electrophotographic photosensitive member, an electrophotographic apparatus and an electrophotographic apparatus unit employing the method. <IMAGE>
