Abstract (en)

[origin: EP0587031A1] The invention relates to a timepiece This timepiece which comprises display means (2), and drive means (M1, M2) which are intended to operate the display means (2), is characterised in that the drive means (M1, M2) include a piezoelectric motor which engages directly with the display means (2). The invention applies, for example, to the driving of a calendar display. <IMAGE>
