Abstract (en)

[origin: EP0587472A1] The ironing board is associated with a steam generator (2), in such a way that the steam is emitted onto the ironing surface of the board (5). The steam generator (2) is connected by means of a hose (8) to a steam-emission zone of small dimension in relation to the surface (5) of the ironing board. The steam-emission zone is, in particular, a steam-diffusion chamber (7) designed to be displaced under the ironing surface (5) opposite the iron (1). <IMAGE>
