Abstract (en)

[origin: EP0587493A1] The blow torch includes a tubular end part (2) filtering an end unit (12) in which slides mobile equipment (18, 19) bearing a supporting member (26) forming a housing for an interchangeable nozzle (3) and which can be moved, under the effect of a force-application device (23, 30) between an inactive position and an active position pressing the nozzle (3) against the end surface (17) of the unit (12) where the fluid-conveying passages of the torch emerge. <IMAGE>
