Abstract (en)
[origin: EP0588003A2] A spraying booth for an electrostatic powder-coating system, on the end faces of which passages are provided for the workpieces to be coated and the walls of which consist of a laminated composite material, has two surface layers 14, 16, which are separated by a core layer 12. The first, outer surface layer 14 consists of an electrically non-conductive material, while the second surface layer 16 is of an electrically conductive form. <IMAGE>
