Abstract (en)
[origin: WO922228A1] In the perfume dispenser described, the container (1) for the scent is long-sided in shape. Fitted at one end of the container is a dispensing device (6). A preferably cylindrical cap (2) covers at least that part of the dispensing device (6) which projects out from the container. Joined to the cap (2), or to the end of the dispenser (1) with the dispensing device, is a clip (4) which acts not only to hold the dispenser in place but also as an outwards-facing publicity space.
