Abstract (en)
[origin: EP0589115A1] Suspended ceiling made up of parallel and equidistant longitudinal support profiles (1) supporting trays (2) which can be moved in terms of translation and each be tilted by pivoting about an axis perpendicular to the said supports (1), the said trays (2) being rectangular panels (2) including, at each corner, a lock (11), the bolt (12) of which is held by a return mechanism (15) in the out position in the face parallel to the support (1), characterised in that the support profiles (1) include two lateral slideways (6b) of the same axis as the profile (1) in which the connections with the panels (2) are provided via members intended to facilitate the sliding of the panels (2) when flat or tilted. <IMAGE>
