Abstract (en)
[origin: EP0589190A1] An arm-rest for sitting furniture is provided with a guide column (9) running in the vertical direction (V), with an arm-rest body (1) guided telescopically displaceably thereon by means of a counter-guide (guide opening 8), and with a locking device (17) arranged on the arm-rest body (1) and intended for vertically fixing the arm-rest body (1) in relation to the guide column (9). The guide column (9) and the counter-guide (guide opening 8) of the arm-rest body (1) are constructed symmetrically in relation to an axis of symmetry (19) running in the vertical direction (V) in such a way that the arm-rest body (1) can be fastened on the guide column (9) in two different mounting positions turned through 180 DEG about the axis of symmetry (19) with respect to each other. <IMAGE>
