Abstract (en)  
The invention proposes a sectional door for garages or the like which is constructed preferably from high-grade wooden members. In order to achieve easier exchangeability of the front pattern, which is produced, if appropriate, in a coffered manner, the sectional door is made from a self-supporting framework which consists of laminated wood and onto which the high-grade wooden members can be screwed as non-supporting elements. <IMAGE>

Abstract (de)  
Um eine leichtere Austauschbarkeit des gegebenenfalls in Kassettenbauweise gefertigten Frontdekors (24,25,26) zu erzielen, ist das Deckengliedertor aus einem selbsttragenden Rahmengestell (9,10) aus Schichtholz hergestellt, auf welches die hochwertigen Hölzer als nichttragende Elemente aufgeschraubt sind. <IMAGE>
