Abstract (en)
[origin: EP0589317A1] Proceeding from a harvesting machine (1) for the treatment of green fodder, which, for carrying out a treatment process for green fodder, has at least cutting, conveying and processing devices (2, 3, 5, 6) for forming a mat of green fodder, the mat emerging at the end of a processing device, the object on which the invention is based is to design the harvesting machine (1) in such a way that, at the end of the treatment process, the mat, released by a processing device, can be deposited and the operation of the harvesting machine (1) is not impaired, this being achieved in that there is provided in an end region of a processing device an apparatus (roller) (10) which separates the mat leaving the processing device from the latter. <IMAGE>
