## Abstract (en)

This invention provides a simple process for production of an (azolylmethyl)(biphenylmethyl)cyclopentanol derivative represented by the following formula (I) in a good yield. This process comprises, as described in the following reaction formula, reacting an (azolylmethyl) (halogenophenylmethyl)cyclopentanol derivative represented by the following formula (II) with a benzene derivative represented by the following formula (III) by light irradiation. <CHEM> wherein X denotes a halogen atom, R<1> and R<2> denote independently a hydrogen atom or a C1 - C5 alkyl group, R<3> denotes a C1 - C5 alkyl group, n means an integer of 0 - 2, and A represents CH or N.
