Abstract (en)

[origin: EP0589780A1] Disconnecting apparatus comprising a main element which can be applied to a low-voltage circuit breaker and a contact holder part added in a removable way to the main element. The contact holder part (25) can be extracted from the main element (23) and has notches or hooks (39) which, in cooperation with stops (43) make it possible to stop it in an intermediate padlockable disconnection position.
