Abstract (en)

[origin: DE4120084A1] The invention concerns the use of alkyl glycosides of the formula R<1>-O-Gn, in which R<1> is an alkyl group with 8 to 14 C-atoms, G is a glycose unit and n is a number from 1 to 3, as surfactant auxiliaries in the pretreatment of textiles. The use of these alkyl glycosides gives flat-shaped textile articles, yarn or flock with a high degree of whiteness, high absorbency and/or a high degree of desizing.
