Abstract (en)
[origin: WO9213474A1] An artificial window (15) comprising a box having a rear wall (17e), and the walls (17a-17d) bounding an interior space which faces longitudinally forwardly; sheets (5) extending laterally crosswise of the space, and viewable pattern associated with the sheets (5) to be illuminated by light passing forwardly from the box interior; light source in the box; a reflector in the box to reflect light from the light source in a direction towards the sheets (5) for effecting illumination of the viewable pattern; there being a member for controlling the illumination of the viewable pattern, as a function of at least one lateral dimension.
