Abstract (en)
[origin: EP0591791A1] The programmable hearing aid provided with a programming socket (6) is distinguished by a space-saving arrangement of the switch elements in that a switching element (10) for switching the hearing aid on/off, an MTO switch, a volume control, a tone control actuator switch, a situation change-over switch or the like can be inserted into the programming socket (6) which is free except during the programming process. <IMAGE>
